

STRETCH HOODER

Type HM80

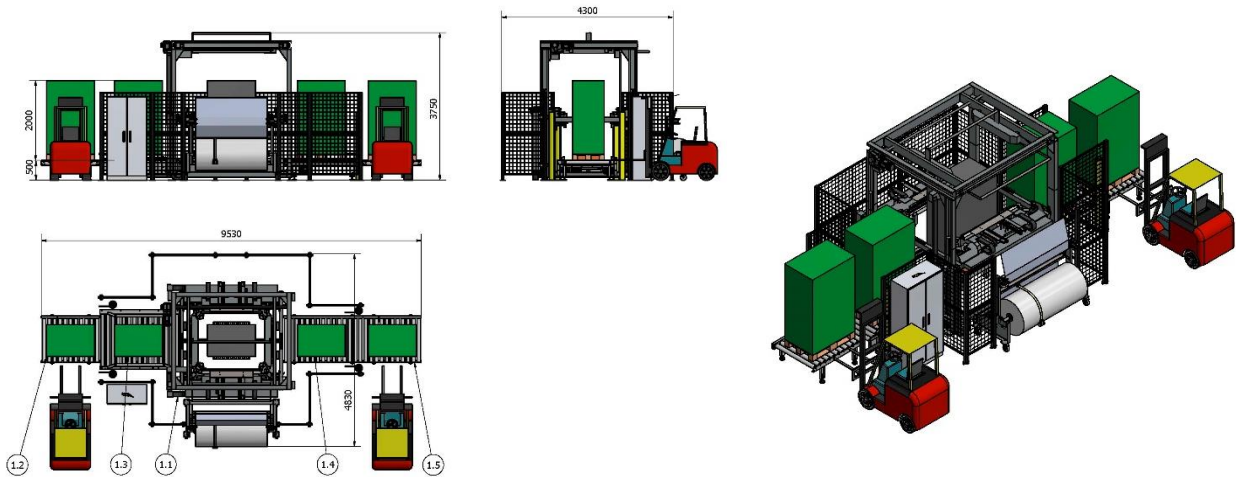

- Most reliable film opening system in the market (no vacuum).
- No gusset in film roll → so possible 4 side logo on pallets and much more time between film change
- Compact machine → Machine height 3750mm at 2000mm high pallet
- Servo drives on all main axis and on all motors → High accuracy, low wear and noiseless operation
- Onboard OPC-UA server
- Low investment and low maintenance costs
- All service at floor level
- Easy installation
- User-friendly HMI

TECHNICAL INFORMATION

Type HM80

Example Layout HM80 – stand-alone system

EHCOLOR A/S is known and specialized in designing and manufacturing high end palletizers mainly for bag products and boxes and have more than 30 years' experience.

As a brand NEW add-on, EHCOLOR have launched a new high-tech stretch hooder with the best technical and economical solutions for customers. Our Stretch hooder is a high-tech revolution and a new way of thinking Stretch hood.

Stretch hood is a solution to stabilize and handle unstable pallet load and minimize the most prevalent types of damage to loads during transport.

The HM80 is sold separate as stand-alone, but also often as part of our Turnkey packing lines, which consist of different bagging machines, palletizers and stretch hooders.

We recommend you to have a tour or test wrap on our HM80 machine before you make your final choose of supplier.
